## Introduction

This guide will give you an overview of how to configure your payroll to include information required in Standard Life's output files. You can create output files for Standard Life to enrol workers and inform them of the contributions taken.

The guide covers:

- Configuring output file information
- Creating an output file each period

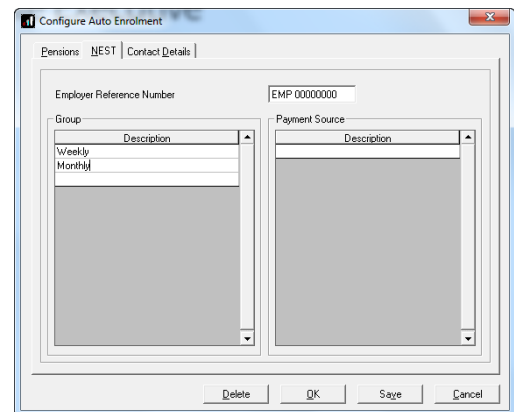

## Multiple Pay Frequency Configuration

You only need to complete the **Multiple Pay Frequency Configuration** if your company has more than one pay frequency, for example weekly paid employees and monthly paid employees. For companies that have multiple pay frequencies, Standard Life require a **Site Code** in the output file for each employee.

If you only have one pay frequency, for example all employees are paid monthly, you don't need to complete this configuration.

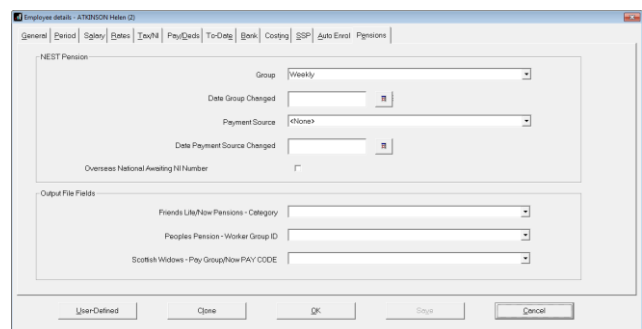

### Site Code configuration

1. Go to the **Pension** menu, select '**Configure Auto Enrolment**', and select the '**NEST**' tab
2. In the **Employer Reference Number** field, enter a dummy number such as '**EMP00000000**'
3. In the **Group** section, create your site codes by typing directly into the **Description** field, for example 'Weekly' and 'Monthly'
4. Click '**OK**'

### Employee Details configuration

1. Go to the **Employee** menu and choose '**Select Employee**'
2. Choose the employee and click '**OK**'
3. Select the '**Pensions**' tab
4. In the **Group** field, choose the appropriate Group for each employee that is a member of the Standard Life scheme

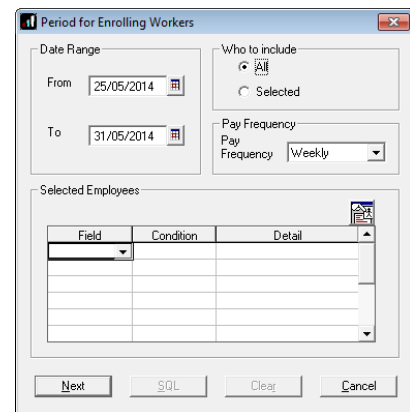

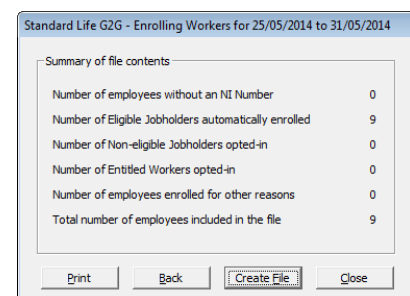

## Standard Life G2G – Joiners file

You should send a Joiners file to Standard Life if you have any employees automatically enrolled or opted in the pay period.

5. In the **Who to include** section, accept the default of '**All**'
6. In the '**Pay Frequency**' field, to choose the payment frequency of employees you want to include in the output file
